

What Customers
Say About Us

Robin Warner, MD
Union Pediatrics
Union, KY

“CHADIS generates income. It saves staff time, it saves paper, it saves printer ink, and it doesn’t tie up your room as long. I just ran my numbers from 2020, which was a slow year, and my return on investment at 140% of Medicare was eight-fold what I paid for CHADIS.

So, it generates income, you get information ahead of time, which allows you better time to prepare for the visit, it allows the visit to be more directed, parents can input their concerns and you can be prepared ahead of time to address those concerns. Most of all it is better overall for the care of the patient. It is a win-win all the way around.”

Katrina Skinner, MD
President of Fairhope Pediatrics
Founder and CEO of Women in Pediatrics
Fairhope, AL

"My favorite aspect of CHADIS is the ability to customize questionnaires to meet the needs of our office and patient population. I also love its ease and functionality. I feel strongly that using CHADIS questionnaires allows patients and families the opportunity to confidentially disclose information or concerns that they may otherwise not offer up during a patient encounter or prompts evaluation of problems that they may have been unaware of. I personally have had concerns listed in CHADIS that when asked by clinic staff or a provider were denied. This electronic platform gives patients and families an outlet to disclose information safely and securely.

We are currently using data received via CHADIS questionnaires for quality improvement initiatives, quality assurance monitoring, and to meet our annual reporting requirements for our Patient-Centered Medical Home recertification. I would strongly recommend CHADIS to any pediatric health care provider looking to enhance the quality and efficiency of their health care practice."

**Dr. Robert Stephens
Cornerstone Pediatrics
Sequin, TX**

CHADIS has been a great timesaver and has improved the quality of the care that I deliver in the office. I used to have a large stack of paper on my desk, of questionnaires and surveys, that needed to be scored and evaluated. With CHADIS that paper has all disappeared because the parents complete those surveys and the scoring is done automatically and is imported into Office Practicum. That benefit in and of itself is worth the investment.

**Steven Hirsch, MD
Hirsch Pediatrics
Rockville, MD**

I can't imagine doing
pediatrics without
CHADIS!

**Dr. Selam Bullock
Kids' First Pediatrics
Raleigh, NC**

Getting CHADIS is definitely
worthwhile. If you were to take
each of those questionnaires
and buy them individually, at an
online pre-visit basis, the cost
is actually cheaper through
CHADIS.

**Dr. Jill Garripoli Pedalino
Healthy Kids Pediatrics
Nutley, NJ**

I have been using
CHADIS for the past few
years and it has changed
my practice. Thank you
for that!

Dr. Walter Scott
Washington State University Psychology
Clinic, Director
Professor of Psychology
Pullman, WA

As the Director of a mental health clinic, I was searching for an easy-to-use tool that would empower our clinicians to provide the highest quality of evidence-based care. CHADIS has been that tool for us. CHADIS has an immense library of measures to assess the full spectrum of mental health problems across the lifespan, for children, adolescents, and adults. CHADIS enables us to easily send these measures to our clients so that they can complete them prior to our sessions in the comfort and privacy of their own homes. The evidence shows that routinely monitoring mental health symptoms leads to more positive outcomes in and of itself. Since adopting CHADIS, we have seen a dramatic increase in the consistency with which our clients complete these measures. We know when our clients are getting well and, just as importantly, when they are not, positioning us to then provide more personalized care. I am certain our clinic would not have transitioned as well as it did to telehealth without CHADIS. And we continue to discover more ways in which CHADIS improves the quality of care we provide to our clients, including online client resources, and tools to communicate with other health providers.
